

OCEAN

Certified interior glass partition systems for cruise ships

SKANDI·BO® 

SKANDI·BO

Scandinavian lightness

Scandinavian design is known for its clean lines and love of light. This heritage shines through SKANDI·BO's range of inspirational products and interior design consulting services.

From a solid heritage in the glazing and building sectors, SKANDI·BO has developed its glass partition system by meeting architects' demand for aesthetic, functional and flexible solutions. SKANDI·BO has two main product lines: Indoor, for land-based building projects, and Ocean for cruise ships.

SKANDI·BO welcome the chance to offer solid technical advice and creative ideas.

IDEAS and solutions

Light, open spaces are aesthetically pleasing. But on a cruise liner, lightweight construction and fire resistance are the dominant factors in design. Put simply, lower weight means better fuel economy and more passengers. SKANDI·BO has years of experience in finding solutions that meet these challenges. We can help you in the development phase of your projects – and we welcome the chance to offer solid technical advice and creative ideas. If you have questions, ideas, or just need to talk possibilities, give us a call.

AESTHETICS without compromise

Clean and stylish aluminium profiles and some of the slimmest glass partition systems on the market give SKANDI-BO partitions a clean, elegant look.

The owners of Princess Cruises chose the OC85 doors and glass partition system for the onboard retail shopping area of their fleet's biggest ship, the Caribbean Princess, which can carry around 3,000 passengers.

FUNCTION

and form

Cruise ships are built to carry passengers – not ballast. SKANDI·BO's OCEAN wall concept is all about weight reduction, because every kilo on the upper levels needs to be balanced by four kilos of ballast.

The OC85 profiles are based on our flexible ID85 system and can be combined with a variety of glass, soundproofing, blinds, whiteboards and doors to give a huge range of architectural possibilities without compromising on the need for lightness.

CHOICE

of colours and finishes

Once your walls are in place, SKANDI·BO can also offer a range of doors:

- Framed glass doors that offer great light transmission, along with effective sound insulation and fire resistance
- Wooden doors with excellent sound insulation that meet standard fire-door requirements

All aluminium finishes are available in standard RAL and anodised colours, and special colours are available on request.

- FLEXIBLE
- FIRE-RATED B15-A60
- LIGHTWEIGHT CONSTRUCTION
- SOUNDPROOF
- WIDE SELECTION OF DOORS
- CHOICE OF FINISHES

FIT

Ultraslim design

Whether you are building or renovating, SKANDI·BO partition walls give you the freedom to design glass walls without compromise. SKANDI·BO's system is quick and easy to install, thanks to prefabrication at the factory for quick on-site assembly.

And once installed, the system stays flexible – walls can be rearranged to suit the demands of new layouts or changes.

OC85 is the all-purpose partition wall that can be supplied in a wide range of widths and heights. It can be supplied with electric or manual Venetian blinds, one- or two-layer glass or one-layer sound-absorbing glass up to R_w 48 dB and personal safety glass with silk printing or foil. OC85 is ready for thermal windows and can be supplied as a combination of a notice board and glass wall.

OC 85

APPROVAL

A certified system

SKANDI-BO's OC85 partitions are the lightest B15-A60 fire-rated glass walls in the world and comply with IMO regulations.

SKANDI-BO APPROVED CERTIFICATE STRUCTURE SYSTEM

Class	Code	Structure
B 15 (-30)	SKANDI FIRE B 15	Single Leaf Glass Door
	SKANDI FIRE B 15	Glasswall
	SKANDI FIRE B 15	Double Leaf Glass
A30 - A60	SKANDI FIRE A 60	Single Leaf Glass

	SKANDI FIRE A 60	Double Leaf Glass
B 15	SKANDI FIRE B 15	Single sliding Door
	SKANDI FIRE B 15	Double sliding Door
	SKANDI FIRE A 60	Single sliding Door
	SKANDI FIRE A 60	Double sliding Door

* Some SKANDI-BO structures are being finally certified at the moment. For a status please check www.skandi-bo.dk. Other certification systems are available on request.

SKANDI-BO

here for you

Flexible is not something that only applies to our products. We work closely with all our clients to ensure they get the solutions they want, without compromising their vision. From initial design, to construction and refurbishment, our consultants are available to help. Even if you do not have a specific project in mind, call us anyway – we are always happy to discuss ideas and concepts related to glass partitions.
