

SLIDING FIRE DOORS

OCEAN

Certified interior glass partition systems for cruise ships

SKANDI·BO® 

OCEAN OC85 Interior sliding fire doors

The SKANDI-BO OCEAN OC85 Sliding Fire Doors are available as single leaf and double leaf framed glass sliding doors MED/EC classified as B0 and B15

Advantages:

- Extremely slim aluminium profile design
- Lowest possible weight in the market
- The doors are certified without threshold allowing continuous flooring design from room to room
- Easy and fast installation to bulkhead by welding or screws

Specifications

- Aluminium profile system SKANDI-BO OC85 in standard RAL colours or anodized
- Manual operation or automation according to customer specification.
- 16 mm fire protective glass

Door type	Class	Max Clear opening		Kgs/m ² *	DNV MED Certificate no
		Width mm	Height mm		
Single Leaf	B0 - B15 (B30)	1385	2445	69	MED-B-00000CU
Double Leaf Asymmetric	B0 - B15 (B30)	2340	2500	69	MED-B-9601
Double Leaf Symmetric	B0 - B15 (B30)	1950	2500	69	MED-B-9601

*Weight incl standard fire protective glass, excl automation

Design options

- Certified with side partitions allowing the sliding door to be integrated as a part of a larger glass partition wall
- Symmetric as well as asymmetric door leaf sizes
- Special colours and other surface finishes on the aluminium profiles are possible
- Fire protective glass combined with function glass, decoration or noise reduction improving glass as an option.
- Automation and remote operation control are optional
