Certified interior glass partition systems for cruise ships

SKANDI·BO® 

OCEAN OC50 - Interior A30 pure glass partition

The SKANDI-BO OCEAN OC50 glass partition wall offer a glass wall solution with silicone joint glass panes making an all over glass surface appearing as a uniform and pure surface without any mullions. You only see the glass, nothing else. The product is available as DNV MED/EC classified wall constructions B0 to A30/FRD60.

Advantages:

- The only A30/FRD60 pure glass wall on the market
- Extremely slim perimeter aluminium profile design
- No vertical mullions, only a pure glass surface
- Very narrow silicone joints between the glass panes
- Easy and fast installation to bulkhead by welding or screws
- Very large glass panes, more than 4,5m² each

Specifications

- Aluminium profile system SKANDI-BO OC50 in standard RAL colours or anodized
- Fire protective structure glass 23 mm or 31 mm
- Noise reduction for the fireglass is Rw 38-43 dB
